Litomyšl Castle was originally a Renaissance arcade-castle of the type first developed in Italy and then adopted and greatly developed in central Europe in the 16th century. Its design and decoration are particularly fine, including the later High-Baroque features added in the 18th century. It preserves intact the range of ancillary buildings associated with an aristocratic residence of this type.

Litomyšl was established around the trade route that connected Bohemia and Moravia at the end of the 10th and beginning of the 11th centuries. The dominant feature of the city is the Italianate Renaissance castle with its more than eight thousand examples of sgraffito, which has been on the UNESCO World Cultural and Heritage List since 1999.
