Co-funded by the

of the European Union

Context and Content

“To develop the video-making and marketing competences of youth workers.”

To reach this purpose, we set the following objectives:

Increase video-making and marketing competencies, among participants of the project

To gain basic knowledge on modern programmes and platforms supporting video-making, promotion and dissemination as well as the basic rules of copyrights, creative commons etc, among participants of the project

To increase willingness to make a positive change in their communities and develop empathy towards people with fewer opportunities, among participants of this training course

After this training course, participants will develop more confidence in digital skills, whilst learning new ones that will stay with them long after the project has finished.

The participants will attend training sessions built around non-formal education methods. These will begin at the preparation stage of the project and continue through the implementation phase to the evaluation and follow-up.

During the project's major activity we will be working with 6 charities and NGOs local from Bacoli. Our participants will use the knowledge and skills they have learnt in earlier sessions to produce promotional videos for these organisations.
